How to use the Web and social media to create a professional and scholarly community

May 12 from 2:30 to 4 pm in Alkek 107

Salim Rezaie, M.D.
University of Texas Health Science Center at San Antonio

About the Keynote Speaker
Salim Rezaie, M.D., was raised in San Antonio, and is a home grown product of St. Mary’s University, having graduated with a Bachelors of Science in 1999. As a result of his educational training, experience, and mentorship, he went on to complete his medical school training at Texas A&M Health Science Center in Temple, TX, and followed that up with a combined Emergency Medicine/Internal Medicine residency at East Carolina University in Greenville, NC. Currently, Dr. Rezaie works as a faculty member at UTHSCSA in San Antonio, TX in both departments of emergency medicine and internal medicine. Salim’s academic focuses include medical education, social media as a tool for education (FOAMed), and building the bridges between internal medicine, critical care, and emergency medicine.

Keynote Session (May 12 from 2:30 to 4 pm)
“How to use the web and social media to create a professional and scholarly community.”

Even in such a Web-connected world, Dr. Salim Rezaie saw there was a lack of scholarly, real-world case information in the fields of Emergency Medicine and Internal Medicine available online. Thus, in November 2013, he created the Website REBEL EM (Rezaie’s Evidence Based Evaluation of Literature in Emergency Medicine) to consolidate key information into high-yield reviews and charts. The results of which have been an international success. Dr. Rezaie will share lessons learned about his approach to academic and professional scholarship with Web tools and social media.

RSVP
Email Jeff Schomburg (jschomburg@stmarytx.edu) or call 210-431-5073 to RSVP for the May 12 keynote event. Breakfast and lunch will be served.
